

Liquid-Ring Pumps that Provides Tolerance to Your Site Conditions

Two new 100% Fully Recirculating Liquid Ring Pump System. These Revolutionary pumps requires no external water supply and are remarkably easy to use.... Just plug it in and let it run. Take a look at the Onion Enterprises system's and you will agree... Onion Enterprises has taken vacuum technology for Soil and Ground-water remediation a giant leap forward.

Introducing Vmax from the people who pioneered the first oil-sealed Liquid-Ring Vacuum System and ONION ENTERPRISES

Above OEVmax Model 750k, 750 cfm (50 hp) oil-sealed pump with the DX-5 air/oil separator.

The OE System is built for maximum productivity:

- Built for the toughest application, operates continuously and can tolerate accidental carry over of liquids and solids
- Eliminates carry-over concerns with its patented DX5 separator Ensures the cleanest environment down to 14" Hg
- Maximum warranty 3 years
- Low maintenance operates 10,000 hrs without an oil change
- Quiet moist models under 80 dBA at 3 feet
- Flow rates from 35-4000 acfm. Twenty Models-See Examples ↓

Introducing 2BL Water sealed Liquid-Ring Vacuum System

A Totally Cool and Quiet pump. With operating temps. that stay below 110°F, the exhausted air is below the intake temps.,and dried at the same time. Reducing carbon consumption due to low heat and humidity values. Runs at less then 73dB.

The system comes complete with:

- ◆ Liquid Ring Pump
- ◆ Moisture Separator with discharge pump level control(HH, H, L)
- ◆ Progressive Cavity Pump
- ◆ Flow Totalizer
- ◆ Vacuum Gauge, Air filter
- ◆ Internal water system, No external water needed after initial fill in most cases. Less worry about contaminant carry-over
- ◆ Control Panel
- ◆ Particulate filter

Our 15 HP system with a maximum flow of CFM and vacuums greater than 28 inches of Hg sells for under \$ 18,500
